DETAILED ACTION

Claim Rejections - 35 USC § 112

- 1. The following is a quotation of the first paragraph of 35 U.S.C. 112:
 - The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.
- 2. Claims 17 and 18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Claim 17 recites the limitation "supplying the samples of said intermediate correlation signal to M input terminals of an adder simultaneously with the step of writing". However, after reviewing the drawings and the specification, particularly Fig. 1 and pg. 11, line 11-pg. 12, line 4, it is the understanding of the examiner that the samples of the intermediate correlation signal are supplied to the input terminals of the multiplier, not the adder, simultaneously with the step of writing.

Allowable Subject Matter

3. Claims 1-16 are allowable over prior art because related references do not disclose an L-chip accumulator for generating an intermediate correlation signal from samples created by an

Art Unit: 2634

oversampling rate which is N-fold of chip rate and a controller for supplying correlation signals to the adder when the correlation signals are supplied to the memory.

Conclusion

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Curtis B. Odom whose telephone number is 703-305-4097. The examiner can normally be reached on Monday- Friday, 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Stephen Chin can be reached on 703-305-4714. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
